INITIAL SETUP

After connecting all devices to the SM-KMN-08, a display topology configuration and display mode must be chosen. By default, SM-KMN-08 is configured to a topology with 8 screens arranged horizontally starting with port 1 on the most left-hand side.

The installation setup must match one of SM-KMN-08's predefined display topology configuration. This can be selected through keyboard hotkey commands. Please refer to the "Display Topology Configuration" for the available display topologies.

SINGLE-HEAD MODE KM SWITCHING

SmartAVI's new PASS (Progressive Automatic Screen Switching) technology allows seamless switching between computers by moving the mouse cursor from one display to another. With PASS, users can effortlessly switch computers for faster productivity. **PASS only works in Single-Head mode.**

MULTI-HEAD MODE KM SWITCHING

When using computers with multiple displays, SmartAVI developed a new feature called Mouse Gesture Switching technology that allows switching between computers through the use of simple mouse clicks and gestures. No device driver is required. Simply press the scroll wheel twice and then move the mouse in the direction of the channel you desire to switch. This feature only works in Multi-Head display mode.

HOTKEY COMMANDS

The Hotkey command is a keyboard sequence used to trigger an action on the SM-KMN-08 through the use of the keyboard connected on the USB port of the SM-KMN-08. To activate the hotkey sequence, press the CTRL key twice and then enter the desired hotkey commands.
